-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: the phrase "with forming in layers" is grammatically incorrect. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear whether claim 1 is directed to a sheet per se or to the combination of a sheet and display panel. Lines 1 and 2 of the claim appear to define a combination in view of the sheet being in front of a display panel, however claim 13 is directed to the combination of sheet and panel. If claim 1 defines a combination then claim 13 does not further define the invention. The claims will be examined as though claim 1 is directed to a combination sheet and display panel.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cobb et al 5,254,388. The reference discloses the invention substantially as claimed, namely a light control film in front of a display panel, the light control panel comprising

plastic transparent sections alternating with plastic dark sections that contain carbon; see column 2, lines 9-23 and column 4, lines 29-32. It would have been obvious to one of ordinary skill in the art to use the light control panel of the reference with any well-known display panel, such as a plasma display panel in view of the disclosure at column 2, lines 9-13, which suggests use of the panel with any display. The reference also discloses that it is old in the art to provide similar light control panels with slanted sections; see column 1, lines 15-20. It would have been obvious to one of ordinary skill in the art to provide the panel of the reference with slanted sections in view of the teachings at column 1, lines 15-20 depending on the end use of the display (claim 2). It would also have been obvious to one of ordinary skill in the art to select any material for the panel as well as sizes of the sections and sheet to provide the panel with the desired optimum properties for a particular end use. The term "soft" is a relative term that does not distinguish over the materials used in the reference since any material may be considered soft to a degree.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
